

# **BRIDGE BUILDING COMPETITION**

## **Round 1:**

- Construction of bridge on a “Bridge Simulation Software” by the team members.
- The Simulation Software will be provided by the organizing committee.
- 24 hour will be given to complete all the levels in the software with minimum budget.
- The winners of the first round will proceed for the final fabrication round.

## **Round 2:**

- The team clearing the first round has to construct a real bridge with limited material provided by the organizing committee.
- Material: - ice cream sticks, thread & fevicol.
- After building the bridge, it will be tested with different weights. The bridge which withstands maximum weight without breaking or collapsing will be the winner.

\*Venue for the event is not confirmed and can be changed according to circumstances.

**INCEPTUM team wishes you all the best...!!!**
